

Grinding Coolant

Application

- Excellent cooling characteristics ensuring Knife Steel will not overheat.
- Very good lubricating effect on grinding wheels. Reduces likelihood of wheel clogging.
- High heat dispensation.
- Safe for operators to use.
- Keeps grinders from forming rust.
- Use in conjunction with Grinder Cleaner to remove all traces of bacteria from lines, pumps and holding tank.
- Recommended to be cleaned same time as coolant changed.
- Summer months recommended to change coolant on a monthly basis (dependant on amount of grinders).
- Winter months recommended every 2 months (subject to grinding volume).
