

GRINDER CLEANER

Maintains system in clean, efficient condition for the health and wellbeing of staff.
Removes all traces of bacteria from lines, pumps and holding tank.
Cleaning recommended at the same time as coolant change.

TECHNICAL

Available in volumes of 5L and 20L
Product codes: MC005 and MC020

GRINDER COOLANT

Excellent stability and resistance to microbial growth, providing extremely long fluid life.
Reduces burning and overheating of Knife Steel.
Change monthly in summer, and every two months in winter - subject to grinding volumes.

TECHNICAL

Available in volumes of 5L and 20L
Product codes: CG005 and CG020

TOOL CLEANER

Premium quality Alkaline cleaner to remove grease, grime, rust, resin and tannin build up on feed rollers, knives, heads and tooling.
Can be added to ultrasonic tanks.
Operational at 80-90 degrees celcius.

TECHNICAL

Available in volumes of 5L and 20L
Product codes: TC005 and TC020

HYDRO GREASE

Resistant to wash out, shock loading and pound out, grease aids cool operation for ball, roller and plain bearings.
Very good pump ability at low temperatures.
Retains soft body and plasticity longer than ordinary greases.

TECHNICAL

Available in "Extreme High Performance" and "High Performance" formulas
Product codes: J1275 and J1233

TABLE LUBRICANT

Reduces friction and resin build up between bed plates and timber.
Especially good on resinous and wet materials.
Leaves machinery clean and unmarked after use.

TECHNICAL

Available in volumes of 5L and 20L
Product codes: HTL005 and HTL020
